

WESTERN DREDGING ASSOCIATION

TAKES PLEASURE IN PRESENTING IT'S 2011 ENVIRONMENTAL DREDGING EXCELLENCE AWARD TO

U.S. EPA GREAT LAKES NATIONAL PROGRAM OFFICE

and

*WISCONSIN DEPARTMENT OF ENVIRONMENTAL
RESOURCES*

For the successful dredging and removal of PCB's and PAH contaminated sediments from the Kinnickinnic River, Wisconsin. This project made significant contributions to the removal of consumption restrictions on fish and wildlife in the Kinnickinnic River and in Lake Michigan near Milwaukee. This outstanding environmental dredging effort achieved the project's goal of cleaning up toxic pollution with the support and involvement of the Wisconsin public, and served as a catalyst to revitalize business and economic development along the river's waterfront. So successful was this environmental cleanup project that it has become the model for multi-stakeholder collaboration, technical innovation, workforce development, and waterfront revitalization.

WE THANK YOU

Paul P. Quinn
President, WEDA

Craig Vogt
Chairman WEDA Environmental Commission
