BILLS

### LOCKOUT / TAGOUT PROGRAM

Prior to performing maintenance, repairs or modifications to any machinery every energy source must be deactivated, residual (stored) energy must be dissipated, energy supplying controls must be in the “off” position, and a positive locking and warning system must be in place.

- Over 50 Toolbox meetings now available online
- PowerPoint Safety Meetings
- Safety Posters

Wellness2000, Inc.

**MOVIE**

# Looking Ahead

- Additional Video Productions
- Continued outreach with safety associations – AGC, ANSI, AWO, NSC
  - CDMCS meetings in different district locations
    - Revision of Fatigue Management Plan
  - Managing the Opioid Crisis within the industry
  - CDMCS safety recognition award / Safety Day
    - Continued membership drive

# MODERNIZING SAFETY CULTURE: COTTRELL CONTRACTING'S BIG SHIFT

SAFETY CULTURE

**COTTRELL**  
CONTRACTING CORPORATION  
EST 1928

# Safety Culture, what is it ?

Safety culture is a part of organizational culture, and has been described by the phrase “the way we do things around here.”

Studies have found that workplace related disasters are a result of a breakdown in an organization’s policies and procedures that were established to deal with safety, and that the breakdown flows from inadequate attention being paid to safety issues.

A good safety culture can be promoted by senior management commitment to safety, realistic practices for handling hazards, continuous organizational learning, and care and concern for hazards shared across the workforce

# The Cottrell Safety Journey

- The company “buy in”
  - Stop work authority
- Improving Company Safety Policies
  - Upgrade of Safety Gear
  - “Hands On” Training
- Having a open channel to senior management
  - Site visits

**Respect & Accountability**

Respect...has to be earned

Listening to what the crew  
has to say- taking  
suggestions

Don't ask someone to do  
something you wouldn't do

Share safety experiences

# Connecting with the crew during Safety / Toolbox Meetings

Don't Read the "Toolbox talk" verbatim

Some people are visual learners

Use different methods and ways to teach

Hands on training

Notice the ones that are making the difference,  
use positive reinforcement

**Accountability:** an obligation or willingness to accept responsibility or to account for one's actions

How is this accomplished?

# Monitoring

- Drone Surveillance
- Onboard Camera Systems
- Visual Inspections
- Night / Weekend Visits

**It's not about spying, it's about safety. It's about holding people accountable for their actions.**

**An average American citizen can be caught on camera more than 75 times a day.**

## Results

Injuries down 70%

Incidents down 50%

Dramatic increase in near miss reporting

No lost time or serious injuries to 3<sup>rd</sup> quarter 2017
