Everything is BIG in Texas

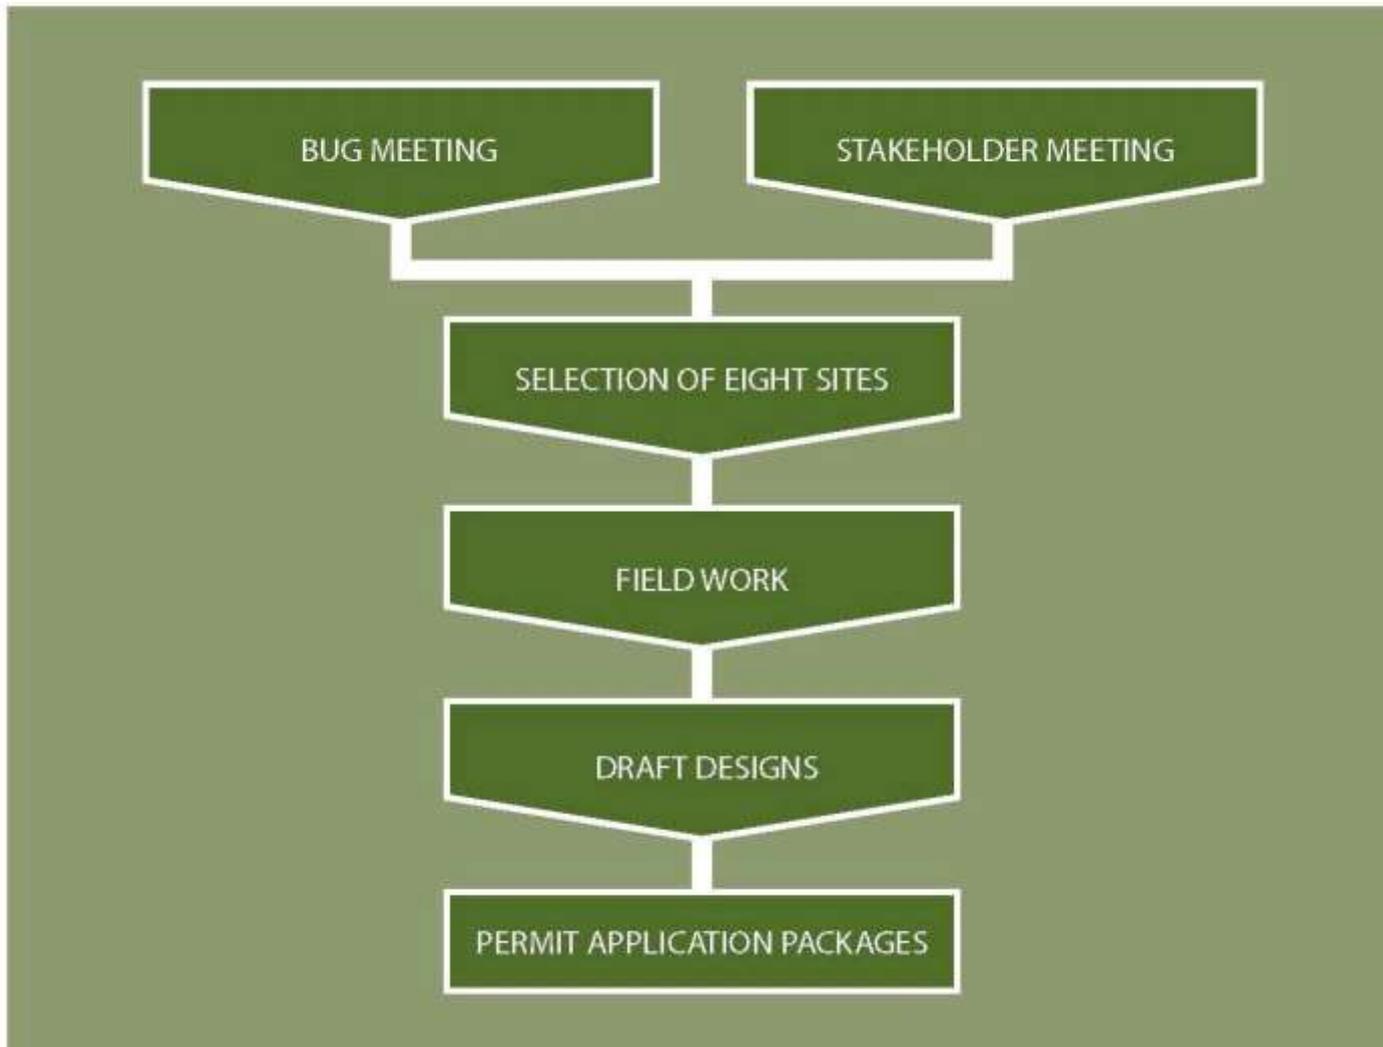

Beneficial Use Groups

BUGs have been successfully used in Texas and elsewhere to promote BU projects. Related groups include the Houston Ship Channel BUG, USACE North Gulf Intracoastal Waterway Interagency Coordination Team, GLO Coastal Resiliency Advisory Groups, and the Galveston County Beach Erosion Task Force. We expect the BUGs established herein will likely have members from these, and other, stakeholder groups.

Four regionally focused BUGs, which correspond to GLO's coastal regions (2013), will be established to achieve the following goals:

- Promote BU
- Define priorities and guiding principles
- Coordinate actions among agencies
- Assist in the identification of suitable BU sites
- Create strategies for efficient permitting of BU projects
- Facilitate regulatory approval

Goals and Objectives

Questions/Discussion
