

EXHIBITORS

The dredging exhibition showcases leading companies from around the world, who will be demonstrating their latest products and services.

► Southwest Wire Rope | www.southwestwirerope.com

Southwest Wire Rope was established in 1966 to meet a strong demand for reliable service and quality wire rope required by industries along the Gulf Coast. Since those early years, we have expanded and increased our product line to meet diversified markets around the world. Today, we are a prime supplier of material handling, lifting & mooring products globally. Southwest Wire Rope is the only rigging shop specializing in the dredging industry. ■

► Watermaster | www.WatermasterNA.com

Watermaster North America (WMNA) is the licensed US manufacturer and distributor of the Watermaster AMD 5000 Amphibious Multipurpose Dredging machine. WMNA builds US made, Jones Act Compliant vessels in Onaway, MI for sale throughout the US and Canada. The versatile, multipurpose waterways maintenance and construction machine is easily deployed, has excellent mobility, and offers a wide variety of solutions for shallow water work in areas such as canals, rivers, industrial ponds, lakes, marinas and seashores. The Watermaster's capabilities include suction dredging, backhoe dredging, raking, pile driving, debris removal, and more – all with one versatile machine. ■

► SAS Global Corporation | www.sasglobalcorp.com

SAS Global Corporation has the wear resistant solution. Sand or rock with high hardness, coarse granularity, and sharp edges can cause excessive wear rates in Dredging pumps, pipes, and wearing rings, resulting in high maintenance expenditures and lost production. SAS Global's proprietary SureAlloy® Premium Carbide Overlay Materials were developed to fight the highest levels of abrasion and keep your equipment running at peak performance. ■

► Severson Environmental Services, Inc. | www.severson.com

Severson is one of the only pure environmental firms that has successfully transitioned from land-based remedial action projects into contaminated sediments remediation. This transition began in 1993 when Severson was awarded and successfully completed the first large-scale Superfund site sediment remediation project at the Marathon Battery Site on the Hudson River. Severson has gained significant insight and operational knowledge in environmental dredging, dewatering and water treatment since the Marathon Battery project and has continued to work on some of the nation's most visible contaminated sediment sites. Today Severson partners with clients and consulting engineers to address difficult process design and field implementation issues at sediments sites throughout the United States. ■

The dredging exhibition showcases leading companies from around the world, who will be demonstrating their latest products and services.

► Industrial Tomography Systems | <https://www.itoms.com/>

Industrial Tomography Systems is probably the leading supplier of non-nuclear densitometers for dredging, with systems deployed across the world, since 2015. One reason our customers say they switch from nuclear densitometers is delays in registration & regulation when starting new dredging projects/jurisdictions. One reason our customers say they prefer our densitometer is a sensor with no moving parts that will work in extreme conditions.....most recently at a depth of over 4,000 meters. ■
