

The Western Dredging Association takes pleasure in presenting the 2014 Annual Safety Award to:

Enbridge Ceresco Dam Dredging Project

Kalamazoo River, MI

Prime Contractor: Terra Contracting Services, LLC

Terra's commitment to safety is demonstrated from the field staff to senior management utilizing the Loss Prevention System. The Loss Prevention System is a safety program focused on behavior and actions designed to prevent or reduce losses by developing Job Specific Analysis for each job component. There have been no fatalities since the company was founded in 2001. In 2005 the LPS was implemented resulting in a significant decrease in total recordable incidents throughout the company. This safety culture provides clients with the assurance that the work will be performed in the safest manor possible, and each will leave work in as good or better condition than they arrived.

Your exceptional efforts and dedication is an outstanding example of surpassing WEDA's stated safety goals and objectives to raise safety awareness throughout the dredging and marine construction industry is greatly appreciated.
